

Global Annual FinTech Summit 2018

Welcome Letter

Dear Delegates,

The International Insurance Society (IIS) is pleased to again endorse the 'Global Annual FinTech Summit 2018', which will be held on May 21-22, 2018 at Crowne Plaza Shanghai. It will serve as an effective platform for industry players seeking knowledge about the industry.

The finance industry has been strongly affected by the use of new technologies, as new payment models, and tools such as cloud computing, blockchain, and big data analysis, have altered the landscape of doing business. China is leading the charge into a cashless future; in 2016, the volume of mobile payments doubled to an estimated \$5 trillion. This explosive growth has had a substantial effect on retailers and financial institutions across Asia, and around the world, who have adopted cutting-edge payment technology in the hopes of establishing a foothold in the Chinese market.

On account of these developments, Duxes will hold the 2nd China Fintech Summit 2018 on May 21-22 in Shanghai. The summit will gather representatives of leading financial and technology companies, as well as policymakers, industry analysts and experts, to exchange ideas on important issues related to FinTech. Over the course of two days, speakers and panelists will address the regulatory regime for FinTech in China and other jurisdictions, applications for blockchain, cloud computing and big data in finance, as well as the expansion of Chinese mobile payment models around the world.

IIS mission is one of international collaboration, bring together key decision makers from the insurance industry to combine their knowledge of regulatory issues, finance, and governance, utilizing research as a force to drive global industry growth and innovation. Our vision is to position the global insurance industry as a key contributor to the open dialog on the economic and social development of markets.

We are certain that the Global Annual FinTech Summit 2018 will provide delegates with productive new knowledge and we wish you a most successful conference.

Yours sincerely,

Michael J. Morrissey
President and Chief Executive Officer
